Mechanical Sofa Cushions Customize Your Seat

(C) FORTRESS SEATING

The age of customization has reached a new apex.

Well, that's a bit of an overstatement, but the adjustable sofas made by Fortress Seating do provide a level of individuality not typically found in home theater seating.

The [Motorized Adjustable Back sofa](#) does exactly what its name implies -- it uses a motor to adjust the back pillow (see pictures). The adjustable feature provides a high-backed pillow for those "lean-back" moments (like watching a movie ... or listening to the song "Lean Back"), while the low-profile setting fits right in with family visits, tea parties and other non-leaning-back moments.

The adjustable back is a \$700 option that can be applied to any of Fortress Seating's Off Broadway Theater Seating designs (the pictured sofas cost \$8,800 total). The Motorized Adjustable Back sofa is sold through authorized [Fortress dealers](#). -- Mac Slocum

- ▶ Pillows on sofa mechanically raise and lower.
- ▶ Adjustable back is a \$700 add-on option.
- ▶ Available for order through [Fortress Seating dealers](#). Sofas will ship in December.
