### Winner 10 Best 2008 Design

Supersized at 72 inches wide and 60 inches deep, the Deco Lounger from **Fortress Seating** can be pushed together to accommodate one loving couple or one sprawling TV viewer—or split into two parts for those times when you want a little more personal space.

Like Fortress' other **Deco** seating products, the Lounger is available in a seemingly unlimited array of fabrics, leathers, and colors. Other sizes are available, too, as is a motorized recliner option. And of course, it wouldn't be home theater seating if it weren't available with cupholders.
